SWAMINATHAN KANNAN

Frontend Software Engineer | Angular · TypeScript · JavaScript

Trichy, Tamil Nadu, India | +91 6374528425 | swaminathankannank@gmail.com

linkedin.com/in/swaminathan-kannan | github.com/swaminathankannan | swaminathan-portfolio.vercel.app

PROFESSIONAL SUMMARY

Frontend Software Engineer with 3.5+ years of experience building enterprise-grade Angular applications for data-intensive, real-world business workflows. Skilled in TypeScript, RxJS, DevExtreme data grids, and reusable component architecture, with hands-on experience delivering role-based access control (RBAC), dynamic Reactive Forms, dashboards/reporting, and document-management modules. Comfortable operating within CI/CD and code-quality pipelines (GitLab, Docker, SonarQube), and has recently contributed to engineering automation initiatives that apply Python and Cursor-based AI-assisted tooling to SonarQube remediation and code-quality reporting.

TECHNICAL SKILLS

Languages & Markup: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

Angular Ecosystem: Angular (19/20), Angular CLI, RxJS, Reactive Forms, Standalone Components, Angular Signals, Component-Based Architecture, PWA / Service Worker, ngx-translate (i18n)

UI / Data: DevExtreme (DataGrid & UI widgets), Angular Material / CDK, Bootstrap / ng-bootstrap, Chart.js, Responsive UI Development

APIs & Data Layer: REST API Integration, RBAC / Role-Based Access Control, SQL, MySQL, ExcelJS, jsPDF

Delivery & Quality: Git, GitHub, GitLab, GitLab CI/CD, Docker, SonarQube, Unit Testing (Jasmine/Karma), Playwright (E2E), Postman

Automation / AI-Assisted Engineering: Python, Bash, Cursor-based AI code remediation, automated quality reporting

PROFESSIONAL EXPERIENCE

Niiv Software Pvt. Ltd. **Jul 2022 – Present**

Frontend Software Engineer

Selected Projects / Engineering Initiatives: C.R.P. · P.F. · NEST Platform · AI-SONAR · Daily GitLab + SonarQube Reporting Automation

C.R.P. *(Jan 2023 – Present)*

Angular · TypeScript · RxJS · DevExtreme · REST APIs · SCSS · Bootstrap · MySQL

- Architected and maintained enterprise Angular modules for recycling certification, production plant management, and business workflow automation, supporting core operational processes.
- Built DevExtreme DataGrid interfaces with server-side pagination, filtering, export, and custom search-expression mapping for large, complex datasets.
- Integrated multiple REST APIs via Angular HttpClient and RxJS to model production plant hierarchy and organization-association structures in the UI.
- Developed a reusable component and shared-service architecture, including an RBAC-based UI layer and dynamic Reactive Forms with validation and dependent dropdowns, reducing duplication across modules.
- Delivered enterprise dashboards, secure file uploads, and document-management workflows; partnered with backend engineers on API contracts, payload design, and production issue resolution.

P.F. (Plastic Finder) *(Sep 2022 – 2024; returning 2026)*

Angular · TypeScript · DevExtreme · REST APIs · SCSS · Bootstrap · MySQL

- Built responsive Angular modules for an industrial plastics marketplace — including Plastic Finder and Plastic Wiki — implementing advanced filtering, search, and grid operations across product, catalog, and organization data.
- Developed reusable UI components and integrated REST APIs to establish a consistent frontend foundation for product search, dashboards/KPI reporting, and document workflows.
- Improved data-loading performance and refactored shared services to strengthen responsive layouts and overall user experience.

NEST Platform

Angular · TypeScript · RxJS · DevExtreme · Chart.js · ngx-translate · PWA · Playwright

- Contributed to enterprise Angular modules for an industry compliance and reporting platform, including product data sheets, company/user administration, shared documents, and production-plant reporting workflows built on DevExtreme grids and role-based permissions.
- Supported reusable data-grid and reporting components using Angular, TypeScript, RxJS, DevExtreme, and Chart.js, alongside PWA and internationalization (ngx-translate) support.
- Worked within a GitLab CI/CD and Docker delivery pipeline, with SonarQube quality checks and Playwright end-to-end test coverage.

AI-SONAR — SonarQube AI Remediation Automation

Python · Bash · GitLab CI/CD · SonarQube · Cursor SDK

- Contributed to an AI-assisted SonarQube remediation workflow that scans GitLab projects, applies Cursor SDK–driven code fixes, and runs post-fix build validation with automatic recovery on failure.
- Supported merge-request automation and quality-gate validation logic that opens fix branches and merge requests only after post-fix changes are verified, reducing manual remediation effort.

Daily GitLab + SonarQube Reporting Automation

Python · ReportLab · SonarQube API · GitLab API · Cursor Automation

- Contributed to a Python-based reporting pipeline that joins SonarQube quality data with GitLab merge-request history to generate a scheduled, bilingual code-quality PDF report and evidence manifest.
- Supported quality-gate classification, AI-fix cycle tracking, and trend reporting, with automated publishing to GitLab Wiki via a Cursor-scheduled automation.

IBM Online Internship — Ceasura Technologies **2021 – 2022**

- Contributed to process and workflow improvements that reduced raised-ticket volume.

SELECTED PROJECTS

Personal Portfolio — portfolio-v2 (swaminathan-portfolio.vercel.app) *2026*

Angular 19/20 · Standalone Components · Angular Signals · Bootstrap

- Designed and deployed a production-ready portfolio using Angular 19/20 standalone components and Angular Signals, achieving Lighthouse scores of 99 (Performance), 100 (Accessibility), and 100 (SEO).
- Built a custom design system (Geist typeface, single-accent theme, Bootstrap grid) and resolved component-level rendering issues, including content-projection and sanitization edge cases.

EDUCATION

M.Sc. Computer Science — Pioneer College of Arts and Science, Coimbatore — GPA 7.50/10 — 2024–2025

B.Sc. Computer Science — N.C.T College (Autonomous), Trichy — GPA 7.20/10 — 2019–2022
